

Manual Controls

Out of Reach Skylights

Colour & Material

Silver / Grey. Clear anodized aluminium. Plastic handle cover & hook.

Application

VELUX rod controls are used to operate openable skylights, manual blinds for skylights and manual blinds for roof windows in out of reach installations.

Operation ZXT 200
 ZXT 200 Extension Rod. The rod is a straight rod with a hook on the end, designed to hook into the handrail of the manual blinds. Pulling or pushing the rod will operate the blinds up or down.
 Length: 1 metre – extends to 1.85 metres
 For: Manual blinds

Operation ZCT 300
 ZCT 300 Extension Rod. The rod has a crank handle winder with a hook on the opposite end, which connects to a hook on the skylight. Turning the handle will open or close the skylight. One rod can operate multiple skylights.
 Length: 1.45 metres – extends to 2.85 metres
 For: Manual openable skylight

Within Reach Skylights

Colour & Material

Silver / Grey / White. Clear anodized aluminium. Plastic handle cover & hook.

Application

VELUX in-reach controls are used to operate openable skylights and manual blinds for skylights.

Operation Winder Handle
 The winder handle is a crank handle fixed permanently onto manual opening skylights. One handle is needed per skylight.
 Length: 120mm
 ZZZ 212 for: VCM low-pitch skylight

Operation Winder Handle
 The winder handle is a crank handle fixed permanently onto manual opening skylights. One handle is needed per skylight.
 Length: 120mm
 ZZZ 201 for: VS manual skylight

Important Note

When determining the correct rod control needed, consider: Rod controls will be held in home owner's hands approximately 1.5 metres above floor level. An additional 1 metre extension can be ordered if needed.
