

Side-By-Side & Above-Below 'Multi' Combination Flashing (4 Skylights/Windows)

When preparing to install skylights or roof windows in a multi combination it is vital that the rafters are spaced at correct centres. To calculate the rafter centres, simply add 100 mm to the width AND height of the skylight or roof window units being used.

Side-By-Side plus Above-Below Configuration

Available for FS/VS/VSE/GGU

4 Skylights/Windows*

- 1 x EKW 0001 for bottom left hand skylight
- 1 x EKW 0003 for bottom right hand skylight
- 1 x EKW 0004 for top left hand skylight
- 1 x EKW 0006 for top right hand skylight.

*GGU use 0021 complete 'combi' kit (replaces EKW 0001 and EKW 0003).

NB: Exactly 100mm space between each skylight
